Tailwind CSS – WD Lab Classes Reference

Reference for the utility classes used in the 10 Typography and Spacing practical questions (Parts A, B and C). Documentation links are clickable in this PDF.

1. Complete list of classes used

Class	What it does	Tailwind documentation location	Official link
`text-center`	Centers text horizontally.	Typography → Text Alignment	Open docs
`text-3xl`	Sets a large font size (3xl).	Typography → Font Size	Open docs
`text-2xl`	Sets a 2xl font size.	Typography → Font Size	Open docs
`text-xl`	Sets an xl font size.	Typography → Font Size	Open docs
`text-lg`	Sets a large font size.	Typography → Font Size	Open docs
`text-4xl`	Sets an extra-large font size.	Typography → Font Size	Open docs
`text-base`	Sets the base/default font size.	Typography → Font Size	Open docs
`font-bold`	Makes text bold.	Typography → Font Weight	Open docs
`italic`	Makes text italic.	Typography → Font Style	Open docs
`leading-relaxed`	Adds relaxed line spacing for readable paragraphs.	Typography → Line Height	Open docs
`p-4`	Adds padding on all four sides.	Spacing → Padding	Open docs
`p-2`	Adds smaller padding on all four sides.	Spacing → Padding	Open docs
`mb-2`	Adds margin below an element.	Spacing → Margin	Open docs
`mb-4`	Adds more margin below an element.	Spacing → Margin	Open docs
`mt-2`	Adds margin above an element.	Spacing → Margin	Open docs
`flex`	Makes an element a flex container; its children are laid out in a row by default.	Flexbox & Grid → Display / Flex	Open docs
`gap-6`	Sets the gap between flex/grid items.	Flexbox & Grid → Gap	Open docs
`gap-4`	Sets a smaller gap between grid items.	Flexbox & Grid → Gap	Open docs
`grid`	Makes an element a grid container.	Flexbox & Grid → Display / Grid	Open docs
`grid-cols-2`	Creates a two-column grid.	Flexbox & Grid → Grid Template Columns	Open docs
`space-y-2`	Adds vertical spacing between direct child elements.	Spacing → Space Between	Open docs

2. Where to find these in the Tailwind documentation sidebar

Sidebar category	Relevant pages
Typography	Font Size, Font Weight, Text Alignment, Font Style, Line Height
Spacing	Padding, Margin, Space Between
Flexbox & Grid	Display, Gap, Grid Template Columns

3. Quick examples from your practical code

Use	Example class
Centered title	`class="text-center"`
Large bold heading	`class="text-3xl font-bold"`
Space below a heading	`class="mb-2"`
Padding inside a box	`class="p-4"`
Italic quote with readable line-height	`class="italic leading-relaxed"`
Navigation links in a row	`class="flex gap-6"`
Two equal columns	`class="grid grid-cols-2 gap-4"`
Vertical space between list items	`class="space-y-2"`

Important: Classes such as `text-3xl` and `text-lg` control font size, not text color. In Tailwind, the same `text-*` prefix is also used for text color, but the specific utility depends on the suffix.

Version note: The links above point to the current official Tailwind CSS documentation. Your earlier HTML example uses the Tailwind browser CDN v4 setup. If your lab teacher specifies Tailwind v3, some documentation details and setup instructions may differ.
