Tailwind CSS – WD Lab 27

Essential classes for Part A and B questions, plus common layout, spacing and text utilities used in the supplied code. Part C Q7 and Q9 excluded.

1. Essential classes by question

Question	Requirement	Essential classes
Q1 (A)	Left-to-right gradient banner	bg-gradient-to-r, from-blue-500, to-purple-500
Q2 (A)	Background image + white text	bg-cover, bg-center, text-white
Q3 (B)	Glass-effect card	bg-white/30, backdrop-blur-md
Q4 (A)	Image blurred on hover	hover:blur-sm
Q5 (B)	Different border styles + spacing	border, border-4, border-dashed, border-dotted, gap-6
Q6 (B)	Three shadow depths	shadow-sm, shadow-md, shadow-xl
Q10 (B)	Horizontal and vertical separators	border-l, border-t
Q11 (B)	Ring grows on hover	ring-1, hover:ring-4
Q12 (B)	Card lifts + shadow increases	hover:-translate-y-2, hover:shadow-xl, transition

2. Common classes used in your code

These support layout, alignment, spacing, sizing and text. They are not the main effect/filter utilities, but are useful when building each practical.

Class	Purpose	Sidebar / documentation page	Link
`flex`	Creates a flex container; children line up in a row by default.	Flexbox & Grid → Display	Open docs
`items-center`	Centers items on the cross axis (usually vertically in a row).	Flexbox & Grid → Align Items	Open docs
`items-end`	Aligns items at the end of the cross axis (usually bottom).	Flexbox & Grid → Align Items	Open docs
`justify-center`	Centers items on the main axis (usually horizontally in a row).	Flexbox & Grid → Justify Content	Open docs
`gap-6`	Adds space between flex/grid children.	Flexbox & Grid → Gap	Open docs
`mx-auto`	Auto left/right margins; often centers a fixed-width block.	Spacing → Margin	Open docs
`p-4 / p-6 / p-10`	Padding on all sides; number selects the spacing scale.	Spacing → Padding	Open docs
`mt-2 / mt-3 / mt-6`	Adds top margin.	Spacing → Margin	Open docs
`mb-10 / my-8`	Bottom margin / vertical margins.	Spacing → Margin	Open docs
`w-80 / w-72 / w-52`	Sets fixed width using Tailwind's spacing scale.	Sizing → Width	Open docs
`h-72 / h-56 / h-16`	Sets fixed height using Tailwind's spacing scale.	Sizing → Height	Open docs
`text-white`	Sets text color to white.	Typography → Text Color	Open docs
`text-2xl / text-4xl / text-5xl`	Sets font size.	Typography → Font Size	Open docs
`font-bold`	Makes text bold.	Typography → Font Weight	Open docs
`rounded-lg`	Rounds the element's corners.	Borders → Border Radius	Open docs

3. Main Tailwind documentation pages

Documentation page	Sidebar category	Official link
Background Image / Gradient	Backgrounds	Open official docs
Background Size	Backgrounds	Open official docs

Documentation page	Sidebar category	Official link
Background Position	Backgrounds	Open official docs
Background Color	Backgrounds	Open official docs
Border Width	Borders	Open official docs
Border Style	Borders	Open official docs
Border Color	Borders	Open official docs
Box Shadow	Effects	Open official docs
Ring Width	Effects	Open official docs
Blur	Filters	Open official docs
Grayscale	Filters	Open official docs
Brightness	Filters	Open official docs
Backdrop Blur	Backdrop Filters	Open official docs
Translate	Transforms	Open official docs
Transition Property	Transitions & Animation	Open official docs

Notes: Part C questions 7 and 9 are excluded. The common-class section lists useful classes appearing in your supplied code. Your sample loads Tailwind with the v3 CDN; links point to the current official documentation. Utility names shown are used in your supplied code.
